

# WALKWAY & STAIRWAY

Lide Industries walkways and stairways are available as complete units for specific applications or as individual parts. They are constructed of all steel material and are available painted or galvanized. The bridge type method or bracing insures rigid and durable structures. The flanged walkway panels and stairway treads are punched by blister type dies, which provide a safe non-skid walking surface. All joints in the handrails and access openings are carefully protected with smooth flanged gussets. Walkways and stairways are built to API specifications and are OSHA compliant..

There are a multitude of applications for walkway material in addition to standard walk and stair. Some of these are:

- Firebox platforms for treaters
- Ladders
- Walkovers for firewall and pipe runs
- Fence stiles
- Wellhead platforms

## WALKWAY & STAIRWAY

TANK SIZE	STAIR	WALK	EXTENSION
100 bbl 9'6" x 8'	9'	16'	13'
100 bbl 8' x 12'	15'	14'	11'6"
150bbl 9'6" x 12'	15'	16'	13'
